

## William (Billy) Inman

### Experience

---

Billy Inman is the Founder and President of Inman Foodservices Group, LLC (IFSG) and has driven the company to its position as one of the leading healthcare consulting firms in the country. His work includes foodservice facilities in healthcare, hotels, retirement centers, nursing facilities, restaurants, schools, colleges, foodservice commissaries, correctional facilities, military installations, Business & Industry, and more. From the first day of business in August 1985, IFSG's mission has been to provide the highest quality services possible for our clients, on time, in budget, and for a fair and reasonable fee. IFSG has completed over 3000 projects in the U.S., Canada, Europe, Australia, Central and South Americas, Asia and more. With offices in Nashville, Tennessee, Miami, Florida and San Antonio, Texas, we are capable of handling projects anywhere in the U.S., and with over 20 experienced and qualified staff members, we are well practiced in handling projects of any size and complexity.

Prior to starting Inman Foodservice Group, Mr. Inman gained invaluable experience in healthcare design with Hospital Affiliates Development Corporation, a Division of Hospital Affiliates International, the second largest for-profit hospital owner, operator, and developer in the country prior to being acquired by Hospital Corporation of America. During his tenure with HADC, he grew to be the lead hospital designer, with design responsibility for over 100 complete hospitals, ranging from 50 to 400 bed facilities. His coordination between the architects and contractors insured that the design intent was carried from the initial programming through the opening of the facility. This work gave him invaluable experience that few, if any, foodservice consultants can rival. Working as an owner and owner's representative at HADC gave Billy the experience in working on the owner's behalf to insure a thorough and complete project. This host of knowledge is what sets IFSG apart as the leader in healthcare foodservice consulting.

### Expanded Work History

---

American Hospital Association (AHA)  
Tennessee School Foodservice Association (TSFSA)

Prior to his HADC experience, Billy spent three years at Hart-Freeland Roberts, Architects & Engineers developing construction documents for a variety of projects from schools and churches to hospitals and manufacturing facilities. Working at HFR gave Billy the knowledge and experience in construction methods and details needed to construct a variety of different building types.
