

RODOLFO ZEPEDA **Project Coordinator**

Experience

Rodolfo started with Inman Foodservice Group as a CADD operator in 2001, producing mechanical, electrical and plumbing rough-in drawings, detail elevations and isometric views, and converting architectural documents and schedules to provide a complete set of bid documents and equipment cut sheet books. He has been in the foodservice industry since 1997, initially working on shop drawings and field dimensions to produce elevations and isometric drawings, insuring proper installation of custom built millwork and stainless steel equipment.

Mr. Zepeda maintains an open line of communication between the Architects, Engineers, General Contractors and Owners for each project to insure a smooth transition between concept views and the actual working facilities. He has expertise working in the Hospitality segment of the industry, working from the back-of-the-house kitchen designs to the most elaborate bar designs in the front-of-the-house. He has been involved in projects with some of the largest and most renowned hotels and resorts both coast to coast in the U.S. and in the Caribbean. Rodolfo's dedication and attention to detail has been recognized by many clients, resulting in future work with those clients, as well as positive referrals for new client relationships. His bi-lingual skill in Spanish has been a helpful tool in securing and maintaining relationships with a diverse group of clients across the industry.

Academic Background

Miller-Motte Business College, Clarksville, Tennessee

Degree: Associates of Applied Sciences, Computer Aided Drafting

Affiliations

Foodservice Institute of America (FIA)

Professional Experience

Inman Foodservices Group, LLC
